BUILT FOR CONSTRUCTION
BUILT FOR GROWTH

GROW WITH CONFIDENCE

LEVESYS CONSTRUCTION SOFTWARE INTEGRATES AND AUTOMATES ACCOUNTING, PAYROLL, PROJECT AND SERVICE MANAGEMENT. ROBUST AND SCALABLE, LEVESYS AUTOMATES AND STREAMLINES BUSINESS PROCESSES AND CONTROLS, INCREASES BUSINESS EFFICIENCY AND INTELLIGENCE, MINIMISES RISKS AND DRIVES PROFITABILITY.

Tightly integrated with your financials and payroll, you can include project management tools to handle all your contract administration tasks and manage project documentation.

FEATURES AND BENEFITS

- Fully integrated financial performance and operational management
- Total compliance across security, industry and regulations
- Better productivity by automating tasks and processes
- Streamlined processes and operational efficiency to foster growth
- Improved control and business intelligence, with alerts and notifications about critical events and important controls
- Mobile and flexible, with onsite access and real-time data anytime, anywhere
- Effective and accurate decision-making, thanks to dashboards, forecasting and reporting
- Industry-specific technology keeps your business lean and ahead of your competition
- Enhanced collaboration through a single, centralised and fully integrated web-based software solution
- Greater stakeholder management, with rapid access to accurate client and project information
- Customised, easily configured modules

The result is accurate, real time, business-critical information that gives you confidence for decision-making and strategic growth.

WHY CHOOSE LEVESYS?

BROAD, DEEP, ROBUST AND SCALABLE

In four words, that's the LEVESYS promise.

Our integrated system covers off the breadth of your financial and job management needs with the built-in smarts to go deep, capturing every part of your business.

As you grow, LEVESYS scales with you—from five users to 1000+.

BUILT FOR YOUR SECTOR

LEVESYS software is the only fully integrated modular solution with a laser sharp focus on your industry.

Our mission is simple: empower companies in the construction sector with the right tools to confidently grow their business.

BUILT FOR GROWTH

Every successful business reaches a point where they outgrow the different software programs that got them there.

With higher turnover comes higher financial risk. LEVESYS is an accurate, accessible and intuitive system that will help you to manage that risk.

MORE SECURITY AND CONTROL

Business growth forces owners to hand over the reins of day-to-day operations.

LEVESYS is configured to meet your internal control objectives, with varied user permissions and menus, purchasing limits and workflow approvals, comprehensive auditing of key data, and user-definable alerts and notifications to keep your finger on the pulse.

CONTROL, QUALITY AND TRACKING

In a successful business, transparency and accountability over project management is essential.

As well as allowing you to track your projects in real time, LEVESYS forecasts costs and timings to ensure your projects remain on time and on budget.

BUILT IN, NOT BOLTED ON

Many job management systems built for the construction industry rely on APIs and plug-ins to deliver finance modules.

These bolt-ons are useful only up to a point: they can't replace the integrated, intentional functionality of LEVESYS, which is purpose-built for growing construction industry enterprises.

AUTOMATED PROCESSES

LEVESYS automates essential business functions.

Its payroll module, for example, reflects workplace agreements and automatically assigns labour on-costs to jobs, saving time and minimising data-entry errors.

CONTINUOUSLY IMPROVING

Privately owned since it began in the early 1990s, LEVESYS has a strong history of investing to reinvent.

LEVESYS has successfully grown over the years to respond to user feedback—including more intuitive functionality.

LEVESYS continues to respond to user feedback while staying true to its philosophy of offering an integrated, robust product.

“The return on investment is easy to see with LEVESYS, we have doubled the number of projects, tripled our turnover and reduced administrative support personnel by a third in just five years.”

3 LEVELS, 1 INTEGRATED WEB-BASED SOLUTION
