1. Introduction

LEVESYS is very pleased to present you with the LEVESYS Software Version 3.84 Update. This is the first of our planned quarterly updates to be released through 2018 and contains modifications to existing programs as well as updated and new functionality required for clients yet to upgrade to Version 5.

This update must be completed for all clients on Versions 3.83 and later, including those who have already upgraded to Version 5.

We recommend you update your systems as soon as possible to take advantage of the changes. As part of our continuous improvement efforts, we encourage and welcome any feedback you may have. LEVESYS looks forward to seeing these changes rolled out, and is excited by the significant improvements we are working to bring to you from here on.

There will be a major upgrade for Single Touch Payroll (STP) in early June 2018. **The Version 3.84 update MUST BE INSTALLED prior to this.**

If you would like to discuss any of these changes or to find out how to upgrade to Version 5, please contact our Client Services Team on 07 3004 6100.

2. Process Enhancements & Software Updates

The following software updates are included in this release.

Personnel

- **R3622 - CoINVEST Worker Service Return**
Modification to correct the totalling of the productivity allowances.

Jobs

- **U11016 - Job Copy Utility**
Modification to provide the options to copy the Group, Site and Priority codes.
- **U1082 - Job Cost Journal Import Utility**
Modifications have been made to:
 - set the period to last month if the prior period for last month is installed and the journal date is before the current month start date, and
 - only test if the dissection exists against the job budget if the parameter is installed to limit job costs on lump sum jobs to dissections with budgets.

Service & Maintenance

- **E1232U - Asset Maintenance Activities**
Modification to the Schedule All procedure to skip assets which are flagged as non-active.

Purchasing

- **E2252 - Purchase Order Control**
Modification when changing the retention percentages on an original order, to prompt users to apply the same changes to all associated variation orders where the retention percentages are not zero.

Maintenance

- **R1011 - Consolidated Dissection Report**
Modification to remove additional spaces from the dissection code and name.

Fixed Assets

- **U302001 - Fixed Asset Depreciation**
Modifications to:
 - display a "Please Wait Calculating" message whilst the depreciation utility is running, and
 - prevent the utility from running for a future period.

3. Version 5 Inclusions

The following programs are required to enable the upgrade to Version 5 and will be implemented once the upgrade to Version 5 is complete.

- **E1100 - Job Details Maintenance**
Updated to automatically save the PM, CA and Salesperson to the project team.
- **E100201U - Web2 Access Levels**
New program to set the Web2 access levels for users.
- **E121301U - Branch Manager**
Option to set the branch manager for each GL branch which will be automatically added to the project team for each new job.
- **E121401U - Construction Manager**
Option to set the construction manager for each job classification which will be automatically added to the project team for each new job.
- **E303 - Non Payroll Employee Details**
Modification to provide a field to capture the business email address required for each user in Version 5. Whilst this program is a requirement for Version 5, it may still be utilised in previous versions to set up non-payroll employees in addition to capturing the business email address for payroll employees. Any changes made to existing payroll employees via this program, will update the existing details in E304 – Employee Details. This program may also be used to enter the email addresses for consultants set up E302 - Consultant Personnel Details where access to LEVESYS is required.
